CORPORATE SOURCE INDEX

AGARD INDEX OF PUBLICATIONS (1983-1985)

Typical Corporate Source Index Listing

Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (i.e., translation). The page number identifies the page in the abstract section (Part 1) on which the citation appears. The NASA accession number denotes the number by which the citation is identified on that page. The titles are arranged under each corporate source in ascending accession number order.

A
ABG-Semca S.A., Toulouse (France).
Auxiliary power units for wide-body aircraft p. 99 N84-12174
Ada Joint Program Office, Arlington, Va.
Ada status and outlook p 5 N83-22123
Admiralty Surface Weapons Establishment, Portsdown
(England).
Minimization of system vulnerability in Naval satellite
communication networks p 232 N85-20758
Advisory Group for Aerospace Research and
Development, Neuilly-Sur-Seine (France).
Advances in Guidance and Control Systems
[AD-A125687] p.1 N83-22093
Software for Avionics AD-A127131 p.4 N83-22112
Air Traffic Control in Face of Users' Demand and
Economy Constraints
[AD-A127146] p.85 N83-22177
Recent Transonic Flutter Investigation for Wings and
External Stores
[AD-A128162] p 117 N83-22215
Medical aspects of survival. Training for aircrew
[AD-A128157] p 206 N83-22999
Technical evaluation report on the Fluid Dynamics Panel
Specialists' Meeting on Prediction of Aerodynamic Loads
on Rotorcraft
[AGARD-AR-189] p.75 N83-25682
Survey of missile simulation and flight mechanics
facilities in NATO
[AD-A128440] p 130 N83-29276
Proceedings of the AGARD Fluid Dynamics Panel
Specialists Meeting on Wall Interference in Wind Turnels
(AGARD-AR-190) p.130 N83-29277
Ground/Flight Test Techniques and Correlation
[AD-A129433] p.9 N83-30357
Modern Display Technologies for Airborne
Applications
[AO-A129676] p.96 N83-30414
Environmental Effects on Materials for Space
Applications
[AD-A129847] p 135 N83-30479
Modern HF communications
[AGARD-LS-127] p 158 N83-30862

AGARD INDEX OF PUBLICATIONS (1983-1985)

Typical Report/Accession Number Index Listing

Listings in this index are arranged alphanumerically by AGARD report number. The page number identifies the page in the abstract section (Part 1) on which the citation appears. The NASA accession number denotes the number by which the citation is identified on that page. A pound sign (#) indicates that the item is available on microfiche. An asteriek (*) indicates NASA support. Microfiche or hard copy are available from the purchase agencies listed on the back cover.

ACCESSION NUMBER INDEX

AGARD INDEX OF PUBLICATIONS (1983-1985)

Typical Accession Number Index Listing

Listings in this index are arranged alphanumerically by accession number. The page number listed to the right indicates the page on which the citation is located. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.
